To The Devotees

Today COVID 19 (CORONA VIRUS) it is the biggest crisis that the mankind all over the world are grappling with. Why does this kind of virus strike? Let's analyze and also understand the mission of revered Dadaji's MAHAKARAN AVASTHA under the guidance of Param Pujya SAI BABA.

Revered Dada Ji was a very learned omniscient man, that is to say that he was well versed about the Past, Present & Future. However, his knowledge was not only limited to just the Past, Present & Future but it also engulfed Space – Time & Limit too.

We know that the Earth moves on its axis in a day, we call this rotation and while rotating on its axis it revolves around the Sun. The earth takes 365 days to complete a revolution around the Sun. As a result of this rotation and revolution the earth emits

energy/vibrations in the atmosphere. Similarly, other planets and stars also move in the constellation and emit energy into their respective atmosphere. High speed energy draws low speed energy towards it, just as an exhaust fan draws/pulls air. Similarly there is a constant change of energy dynamics. This phenomenon goes on in the sky, thus boundless limitless energy propagates in the constellation. The position of the planet and stars, their conjunction and their alignment with earth, has an effect on earth the same way.

Revered Dada Ji had complete knowledge of space and the position of the planets in the Panchang (Hindu calendar) and its consequences, but his aim was to make this panchang (human form), this body made up of five elements to function to its optimum potential. (The Aumkar which was earlier for 40 seconds was concised to 5 seconds and thus making it even more powerful).

After the redemptions (discharge from bondages) and initiation, in 1976 he stopped doing Kaamkaj (handed over to sevaks) and devoted himself to complete the work towards Mahakaran Avastha. (Upliftment for rebirth - from Karma Dheen to Dharma Dheen Avastha)

In the next five years, from 1977 to 1983, he concentrated on the energies being emitted from space and where and how to receive them, using his perception/knowledge of Space-Time-Limit. For this he performed meditation, rituals (Anushthan) at five centers. To accomplish he travelled about two to two and half thousand kilometers (Pune to Goa via Mumbai and back to Pune). Dada Ji told that around that time a wavelength which arose from the east was used by the Japanese progress in Physics but Revered Dada Ji used it for spiritual progress. Further for this spiritual progress he performed Rudravartan, which was perfected by the Rishis, i.e. performed Rudra, Sukt and Yagna and 11 Havanas, (in Karad) and then the Maharadra Swahakar, through which he softened (mitigated) the mighty Aumkar.

Similarly, during those five years he studied planets, stars and their union, conjunction which occurred after 150 – 2500 years, attained those powers and energies emitted to perfect and use these powers towards Pratima Sidhtata, Karan Diksha, Aumkar SadhanSidhata and establishing Shakti Peeth, Mahakaran Disha, PragyaAvastha etc. and incorporated it in the Guru Marg.

Revered Dada Ji was aware of the vibrations emitted from the outer space and developed a way to adapt them. These energies were assimilated in the Aumkar Sadhna and perfected. His mission of Mahakaran Shakti was accomplished by selectively assimilating the energies emitted from space by planets and stars over a span of thousands of years, invoking it through Guru Shakti and in accordance with Space, Time and limit, it was integrated at an appropriate place in the Aumkar Sadhna, which would eventually help in the upliftment of mankind. Than this perfected Aumkar Sadhna was given to the devotees (which we are doing at present also), so today there is no better means for the wellbeing and welfare of the world. This is the reason that in Guru Marg, we derive blessings and are benefited by the Aumkar Sadhna, Pratimas etc. thus sheltered by any adverse planetary effects.

The environment has the power and ability to sustain life, plants trees etc. which grow and propagate in the lap of nature. The seasons we experience are due to the rotation and revolution of the earth on its axis. The mango tree does not bear the fruit just because it's a mango tree, it bears fruit only when time, season and all the other natural factors are right for it to fruit (bloom). This is how nature takes advantage of the corresponding power of its surroundings. Revered Dada Ji perfected the Guru Marg for the benefit of mankind to enable them to easily absorb the powers of nature and environment.

Earth's movement, its position in the space and the astro energies which are transmitted on the earth and the TejTatva (Fire elements) are responsible for life on earth. Even if we keep grain in an airtight jar, it can get infested with

insects/germs. Countries like Japan and the USA are doing a research as to find out why suddenly one species of fish appear in the ocean in thousands and then disappear in a span of few days? Similarly due to these natural forces/environment, bacteria and virus breed. Neither are they living nor stable (spiritually progressing) but once they infect us they harm us.

Their breeding/activation is due to the combined effect of earth's position and energy waves from space. Likewise, they will be destroyed or deactivated by natural forces. There is a protective layer of grace (Mahakaran Shakti) around the earth. When the ozone layer is punctured, we suffer due to UV rays. So it is our duty to ensure that grace of Mahakaran Shakti is not disturbed, for that we have Aumkar Sadhna.

Today the COVID 19 virus which is emerging should dissipate at the earliest that should be our prayer every day after the Aumkar Sadhna.

With the change of environment and discovery of medicine by scholars/scientists, this virus should be extinct from this world. That's our earnest prayer at the feet of Revered Dada, Param Pujya Baba and divine Punya Vibhuti's.

Let Peace Be To All

Eternal humble Sevak
